

## Replit Prompt - Implement Tinder-Style Recipe Suggestion Cards (Prompt 1 Output) for Shopping and Fridge Modes

### OBJECTIVE:

After the user completes the quiz in Shopping or Fridge mode, Prompt 1 must return 6 curated recipe suggestions.

These suggestions must be presented as beautifully styled Tinder-style swipeable cards.

The user must select one, which will be used to trigger Prompt 2 and generate the full recipe.

These cards should match the visual identity and styling of the existing auth modal and landing page - modern, minimal, and premium.

This feature applies only to:

- Shopping Mode
- Fridge Mode
- NOT Chef Assist Mode (Chef goes straight to Prompt 2)

### 1. FUNCTIONAL FLOW

#### QUIZ COMPLETION

- > TRIGGER PROMPT 1
- > DISPLAY 6 RECIPE IDEA CARDS (SWIPEABLE)
- > USER SELECTS ONE
- > TRIGGER PROMPT 2 WITH SELECTED TITLE + QUIZ INPUTS
- > DISPLAY FULL RECIPE OUTPUT

Prompt 1 should return structured output like:

```
[  
  {  
    "title": "Sticky Miso Gochujang Chicken",  
    "description": "Crispy thighs with umami glaze served over sesame greens."  
  },  
  ...  
]
```

## 2. RECIPE CARD UI (PROMPT 1 DISPLAY)

- Display 6 cards in a swipeable carousel format (Tinder-style UX).
- Cards must include:
  - Title (large, bold)
  - Description (small subtitle)
  - Visual input chips (Mood, Time, Diet, Ambition, Equipment)
  - "Select" button for non-swipe confirmation (desktop fallback)
- Use framer-motion for swipe animation and transition-in effects.
- On card select:
  - Capture the selected card's title
  - Pass selected title + full quiz input context into Prompt 2

## 3. STYLING REQUIREMENTS

Match styling to the AUTH MODAL and LANDING PAGE:

- Use shadcn/ui card, badge, and button components
- Rounded corners, soft drop shadow, brand-consistent colors
- Chips: shadcn/badge with emoji + category (e.g., " Comfort Food")
- Title font: bold, large, dark on light background
- Layout: centered swipe stack for mobile, optional arrows for desktop

Example visual hierarchy:

Card:

- Title: Sticky Miso Gochujang Chicken
- Subtitle: Crispy thighs with umami glaze...
- Badges: Comfort | 30 min | Low Cal | Level 3 | Air Fryer
- Button: Use This Recipe

## 4. DEVICE + RESPONSIVENESS

- Mobile: horizontal swipe (like Tinder), stacked animations via framer-motion

- Desktop:
  - Use horizontal scroll or grid
  - Each card has a "Use this Recipe" button
- Selection must not auto-trigger - explicit confirmation is required

## 5. ONCE SELECTED

- Selected recipe card title + quiz inputs should:
  - Be passed to Prompt 2
  - Replace the previous screen with final recipe card + image + steps

## 6. DELIVERABLE

- Tinder-style recipe cards appear after quiz in Shopping/Fridge modes
- 6 cards shown, clearly styled and functional
- Output is consistent with Flav'r's brand (auth modal, landing page)
- Full handoff to Prompt 2 works reliably
- Swipe + select work across all devices
